Section Title(S)

Terms Applied to Affines • Terms Applied to Consanguineous Kin by the Generational Method

In summary, the parent-child and sibling terms and the generational terms, as they are applied to consanguineous kin by the generational method, are set forth in Figure 2.^A Terms are not attached by the generational method to consanguineous kin more remote than those shown in this diagram. Terms would be applied to more remote kin through their names in the name-relationship.

601
Kinship Terminology

Terms Applied to Affines

I distinguish three categories of affines: those I call "primary," those I call "secondary," and another category that I call "spouses," which comprises persons who are married to ego's kin or secondary affines but who are not primary affines. A !Kung calls his affines *mi twisi*.

601
Kinship Terminology

Once established, an affinal relationship is considered to be indissoluble even though the person through whom the relationship with ego was brought about be dead or divorced. For example, should ego's brother die, his brother's wife remains in affinal relationship with ego, and the application of a kin term and the joking status with her continue to be the same as if ego's brother were alive.

602
Kin Relationships

Primary Affines. I designate as "primary" certain affinal relationships that have a factor in common, namely, that terms applied in these relationships are

fixed, as the parent-child and sibling terms are fixed in [p. 215]

602 Kin Relationships

*

Fig. 2. Terms applied to consanguineous kin

216 those relationships: nothing changes them. The homonymous method is not practiced. When a person comes into one of the primary affinal relationships with ego, ego drops whatever term he used previously and adopts the term that is linked to the affinal relationship, even if the person's name is the same as ego's.

A, [For Fig. 2, see Category 601, p. 215—Analyst]

* Alternate term for grandfather w.s. is *tün!ga*.
