Section Title(S): Terms Applied To Affines

Table 12^A shows how the terms are applied.

601
[Kinship Terminology](#)

!Hoa and *tsau* are the two affinal terms (mentioned earlier) which, along with *!gun!a* ("big [old] name") and *!guma* ("small [young] name"), are the only !Kung terms that are words rather than terms specific to kinship. *!Hoa* is the !Kung word for "man," and *tsau* the !Kung word for "woman." As kin terms they are used only between husband and wife.

601
[Kinship Terminology](#)

The terms *!hoa* and *tsau* have no forms that indicate relative age. The indication of relative age is inherent in the sibling terms *!go* (elder brother), *!kwi* (elder sister), and *tsĩ* (younger sibling). The terms */utsu*, *n!unba*, and *n!untai* have diminutive forms made with the suffix *ma*, used by the older person for the younger: */utsuma*, *n!unbama*, and *n!untaima*. However, among affines the use of diminutive forms is not strictly adhered to. Even though the forms exist, they may be ignored. The diminutive of *≠tum*, *≠tumma* exists but is consistently ignored in the relationships of HuFa, WiFa, and DaHu. HuFa and WiFa are presumably older than ego, but DaHu is presumably younger. I have no explanation for this exception. *≠Tumma* is occasionally heard among name-relatives. *Tũn!ga* m.s. has a diminutive form (*tũn!gama* m.s.), but *tũn!ga* w.s. has a modified form as the diminutive, that is, *toma* w.s. The modified form of *tũn* m.s. is *toma* m.s. *Toma* is the form used for the diminutive of *tũn* m.s.

601
[Kinship Terminology](#)

As to the joking relationship: *!hoa*, *tsau*, *n!unba*, and *n!untai* allow joking; *≠tum* and */utsu* do not. *Tūn!ga* w.s. allows joking; *tūn!ga* m.s. does not.

601
Kinship Terminology

602
Kin Relationships

The pattern of the joking among affines has a form that matches the pattern of joking among ego's parents, offspring, and siblings, as seen in Figure 1. Ego is prohibited from joking with primary affines in the generation of his parents and offspring. In the sibling category, a “cross” and “parallel” pattern obtains among ego's primary affines as among his siblings. Ego jokes with a sibling of the same sex and with the spouse of that sibling. Ego does not joke with a sibling of opposite sex nor with the spouse of that sibling. In the case of ego's spouse's siblings, ego takes the position of his spouse; as his spouse does, ego jokes with the spouse's sibling who is of the same sex as the spouse and does not joke with the spouse's sibling of the opposite sex from that of the spouse. Husbands and wives are paired: thus, a male ego jokes with his WiSi and WiSiHu [p. 218]

Kin Relationships

TABLE 12. Terms Applied to Primary Affines

Applied to Males			Applied to Females		
Affinal Relation-ship	Term	Joking	Affinal Relation-ship	Term	Joking
Ego's Generation					
Hu SoWiFa } DaHuFa }	!hoa	yes	Wi	tsau	yes
	n!unba	yes	SoWiMo } DaHuMo }	n!untai	yes
Generations Adjacent to Ego's					
HuFa } WiFa } DaHu }	≠tum	no	HuMo } WiMo } SoWi }	/utsu	no
Sibling Category					
SiHu	{ tūn!ga m.s.	no	BrWi	{ tūn m.s.	yes
	{ tūn!ga w.s.	yes		{ /utsu w.s.	no
WiBr	tūn!ga	no	WiBrWi	/utsu	no
WiSiHu	!go or tsī	yes	WiSi	tūn	yes
HuBr	tūn!ga	yes	HuBrWi	!kwi or tsī	yes
HuSiHu	≠tum	no	HuSi	/utsu	no

219 but not with his WiBr or WiBrWi; a female ego jokes with her HuBr and HuBrWi but not with her HuSi or HuSiHu.
